Observable Riemann Zero Height Limit $T_{\text{cutoff}} \approx \frac{1}{\pi}\frac{\ln X}{\sqrt{\varepsilon}}$
USTC Lab Limit
($X = 10^{10}$, $\varepsilon = 10^{-2}$ $\rightarrow T \approx 73$)
Cosmic Cutoff
($X = 10^{60}$, $\varepsilon = 10^{-4}$ $\rightarrow T \approx 4397$)
Characterization Precision ε -- $\log_{10} \varepsilon$
Prime Upper Bound X (System Scale) -- $\log_{10} X$
Observable Zero Height Limit $T_{\text{cutoff}}(\varepsilon, X)$
